sheet giving you a few brief
comments on these bills.

D

Logging Recorder (S-75-10-07):

Our old units have only 16 channels total. They are 6 years old and so worn that it is not worth trying to repair them.

The new unit has enough channels to enable full monitoring of all City communication channels. It is of much better construction than the old units and built for future expansion to include more channels if this should become necessary.

(KRO-MAT-J-GRAH)
Gas Chromatograph (S-75-10-10):

Each material has a different boiling point. A gas chromatograph heats an unknown composition and shows the different boiling points of materials in the composition-this then identifies what is in the composition. Primary use is in drug investigation and we presently have nothing like this machine.
